

DIAMOND TAP CUTTER

PRODUCT DESCRIPTION

Southland Tool Mfg. Segmented Diamond Tap Cutter

The Diamond Tap Cutter is for use with your Hydraulic Root Cutter. Available with 1" or 5/8" hub. If the diamond segments break, Southland will replace them with a minimal charge. Available in sizes 6in. to 18in.

Features

- Metal Bonded Diamond Segments
- Nice Thick Steel Barrel 0.165" Thickness
- Back Plate 1/2" Thick
- Welded on Root Cutter Hub 1"

Diamond Blade is rated as a "heavy duty" blade. Much better blade than standard blades that get bent, out of round, and then the diamond teeth break off. Our core sidewall thickness material is stronger and thicker so it wears better. The diamond teeth are laser welded on with a thick butt plate with holes drilled to allow water passage.

Diamond segments can be replaced at no charge to the customer. Just pay the freight both ways.

6" TAP CUTTER IS 5" OD AND 6.5" LONG NOT COUNTING HUB
8" TAP CUTTER IS 7" OD AND 8.5" LONG NOT COUNTING HUB
